REDES NEURAIS ARTIFICIAIS (RNA)

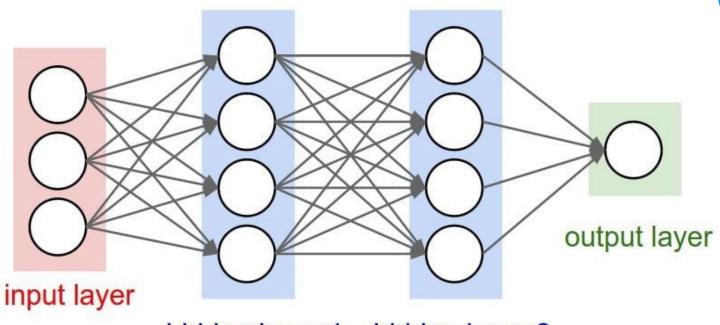

# INTRODUÇÃO ÀS RNAs

As RNAs são redes computacionais que simulam o funcionamento de redes neurais biológicas de forma simplificada.

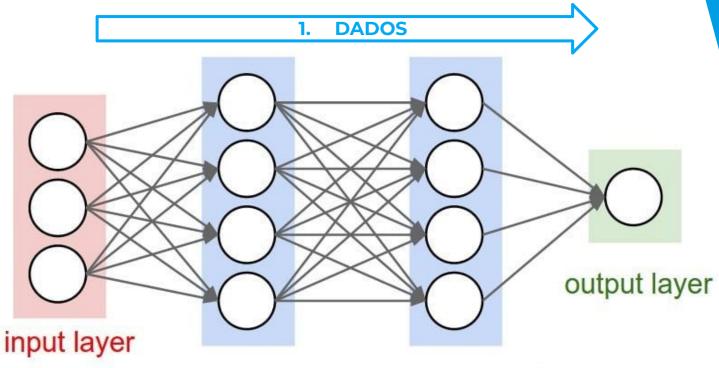

É importante lembrar que o intuito não é replicar os detalhes de um sistema nervoso biológico. O objetivo é conseguir reproduzir a capacidade de aprendizagem.

# **PYTHON**

#### A LINGUAGEM PYTHON

Criada no final da década de 80 pelo programador holandês Guido van Rossum (foto).

Linguagem interpretada, com semântica dinâmica, sintaxe fácil de aprender e possui estruturas de dados de alto nível.

#### A LINGUAGEM PYTHON

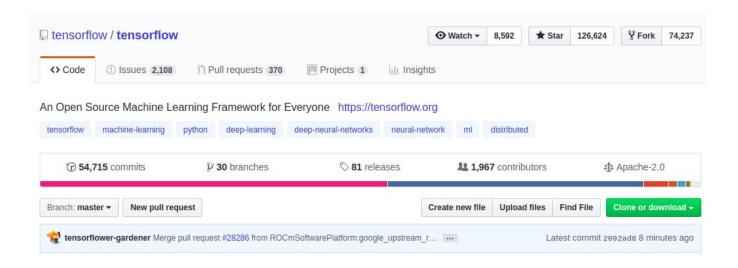

"The mission of the Python Software Foundation is to promote, protect, and advance the Python programming language, and to support and facilitate the growth of the international community of Python programmers."

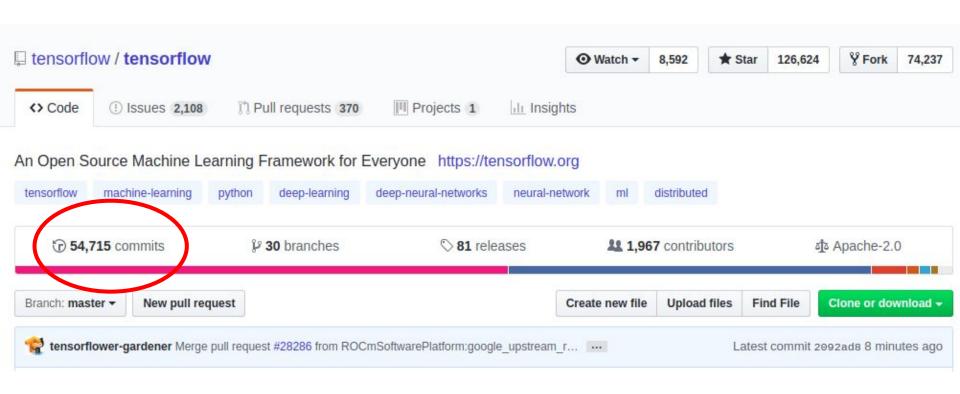

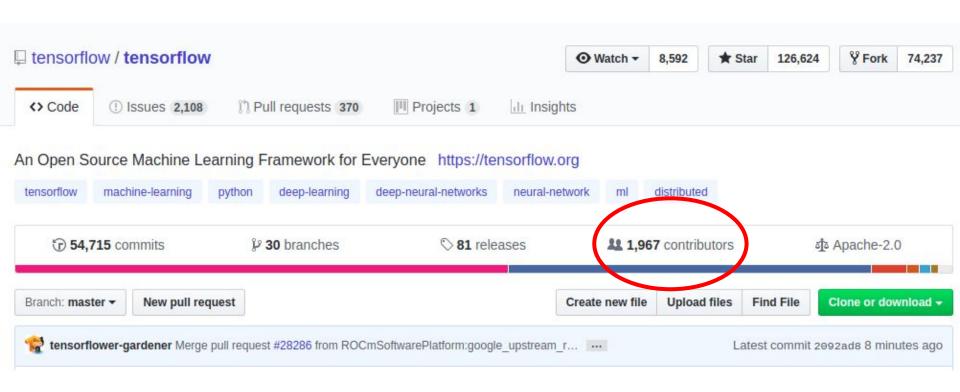

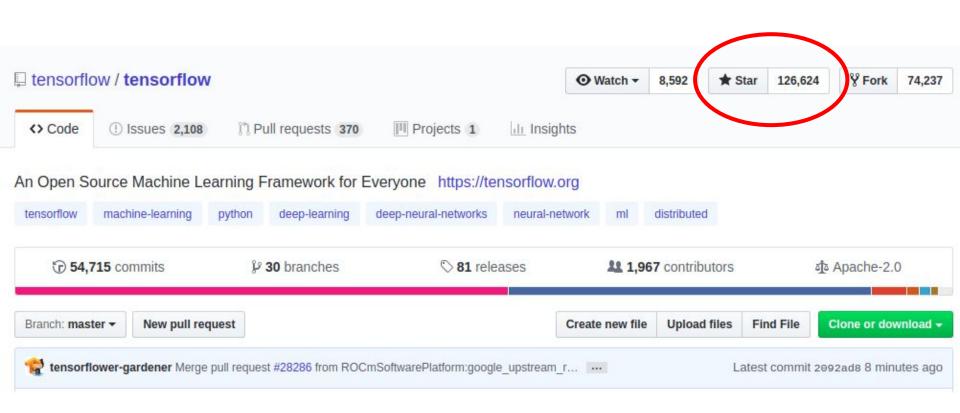

# **TENSORFLOW**

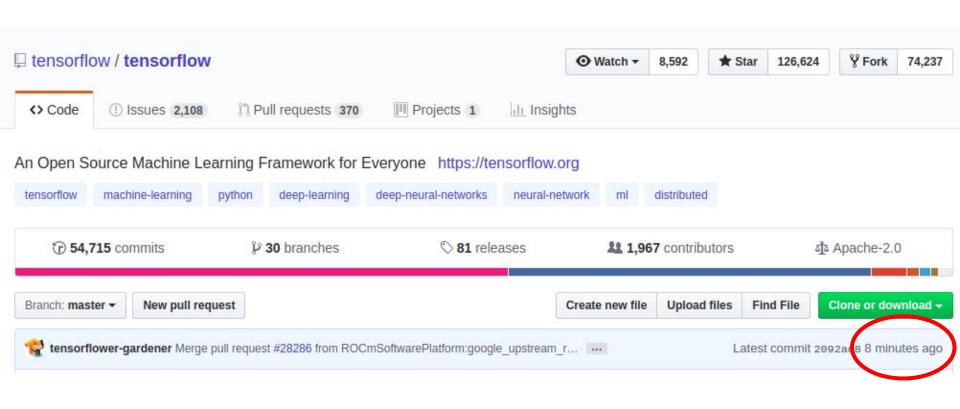

#### **O TENSORFLOW**

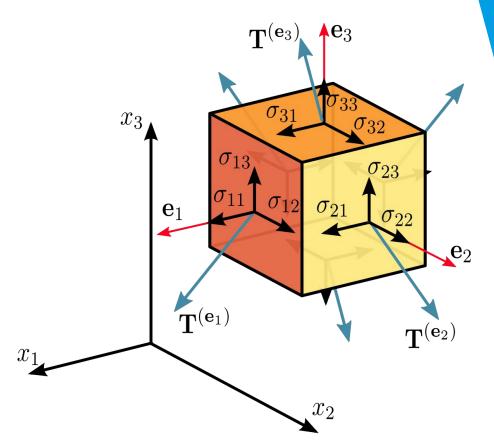

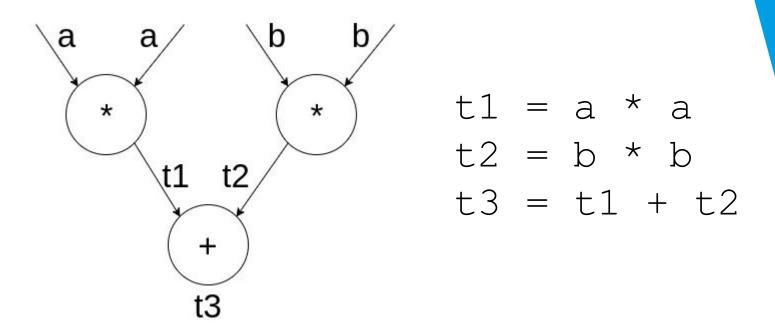

#### AS APIS DO TENSORFLOW

High-Level **Estimators** TensorFlow APIs Mid-Level Metrics Layers **Datasets** TensorFlow APIs Low-level Python C++ Java Go TensorFlow APIs **TensorFlow** TensorFlow Distributed Execution Engine Kernel

#### **O TENSOR**

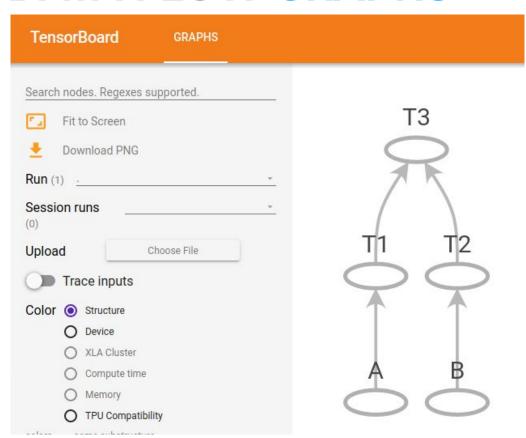

```
import tensorflow as tf
     A = tf.placeholder(tf.int32, name='A')
     B = tf.placeholder(tf.int32, name='B')
 5
    T1 = tf.multiply(A, A, name='T1')
 6
     T2 = tf.multiply(B, B, name='T2')
     T3 = tf.add(T1, T2, name='T3')
10
11
     with tf.Session() as sess:
         writer = tf.summary.FileWriter('./symbolicLogs/', sess.graph)
12
13
         output = sess.run(T3, feed dict={A: 3, B: 4})
         print("Resultado: {}".format(output))
14
```

# kaggle

#### A PLATAFORMA KAGGLE

- "Rede Social" do Data Science;
- Acesso a mais de 16 mil datasets públicos;
- Você pode postar a sua análise do dataset (Kernel) e ver as análises dos outros;
- Universidades, empresas privadas e instituições governamentais organizam competições, inclusive com premiações em dinheiro.
